

Summary Report

05/08/2023 – 05/15/2023

TOTAL HOURS: 35:07:57

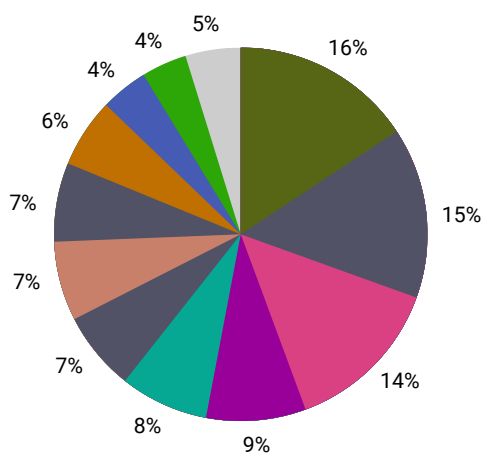

USER

- DB Dominykas Baronas
- AR Armisatas
- MM Martynas Muižys

DURATION

- 17:14:15
- 8:59:01
- 8:54:41

TIME ENTRY

- Responsive design for market, restyling cards, adjusting lazy loading
- Simple leveling functionality, level GUI, GUI movement with player, moving player stats between scenes, saving stats to database
- Market cards, styling, meeting, writing instructions for hack project lecture
- signing message with nonce/fixing errors working on documentation
- message signing/verification when minting
- Fixing infinite lazy loading to finite, rendering of loading and real cards per page, different breakpoints
- preparing for "hack the project"/fixing bugs/reimplementing minting
- Meeting, finishing up project for hacking
- unfolding popover for buy button
- Working on backend requests for the market, meeting, presentation
- ShopScene item display bug fix, fixing player level up bar bug
- Other time entries

DURATION
